

Using the IMPORT Feature

Overview

Use the import feature to avoid re-typing contribution or expenditure data entered into other software, such as a spreadsheet. Notes: double quotes (") may not be embedded in the data. If commas are embedded, the field should be surrounded by double quotes. Double quotes cannot surround the first two fields. The proper format for importing data is described in the attached appendices. It is highly recommended that you double-check imported records to make sure all information was successfully imported and then manually add anything that is missing.

Appendix A: ContributionsPage 2

Contributions may only be imported into a particular report. The file **must** be in the format specified in Appendix A. Go to “In-Progress Reports”, select “Upload File”, and select “Import Contributions/Pledges” from the drop down list. Select “Choose”. A dialog box will appear asking you to choose the file from which to import. Click on the drive letter or folder name if you wish to change folders (or drives). When you have highlighted the existing file, click on the “Open” button. The filename selected will be displayed. Select “Upload” to import Contributions into the report selected.

Appendix B: ExpendituresPage 6

Expenditures may only be imported into a particular report. The file **must** be in the layout provided by Appendix B. Go to “In-Progress Reports”, select “Upload File”, and select “Import Expenditures” from the drop down list. Select “Choose”. A dialog box will appear asking you to choose the file from which to import. Click on the drive letter or folder name if you wish to change folders (or drives). When you have highlighted the existing file, click on the “Open” button. The filename selected will be displayed. Select “Upload” to import Contributions into the report selected.

Appendix C: Description of “child” records:Page 10

An example of a “child” record is a single expenditure which paid for Travel outside the State of Texas for more than one person. The name of the first person would be placed in the first, or “parent” record, and the name of the second person would be placed in a “child” record directly beneath the parent. Appendix C describes how to “relate” the child to the parent by putting the Item_ID of the parent in the appropriate BakRef_ID or Trvl_BakRef field of each child.

Appendix D: Import Data Codes:Page 12

Various fields will contain certain codes in certain fields. These fields have specific codes that correlate to data required in specific data fields in a Contribution or an Expenditure record. Appendix D includes a set of different import codes and their explanations including Title, Suffix, Political Office, Transportation Type, Expenditure Category, and Country codes.

APPENDIX A - FILE LAYOUT FOR IMPORTING CONTRIBUTIONS

NOTE (1): Files should be in comma-separated value format and the filename **should end with a ".csv" extension**. Trailing commas **must** be present for each field regardless of whether data is present. Note: double quotes (") may not be embedded in the data. If commas are embedded, the field should be surrounded by double quotes. Double quotes cannot surround the first 2 fields. If field names are on the first line, please begin that line with the "#" character.

SAMPLE FILE: [Contribs.csv](#)

(the contents of this file are also printed at the end of this Appendix)

NOTE (2): The second column is a list of codes indicating whether a field is required for reporting purposes. "Rx" = Required field; TEC rejects filing if absent; "R" = Required field, but TEC accepts filing; "Cx" = Conditionally Required field; TEC rejects filing if absent; e.g., First Name is required only when Entity Code = "I"); "C" = Conditionally Required but TEC accepts filing; "o" = optional field; "Co" = conditionally optional; e.g., Field 07 (Contributor Title) is optional when Entity Code = "I", but is not applicable (and should be blank) when Entity Code = "E".

APPENDIX C: Description of "Child" records

BACK-REFERENCING TO RELATE "CHILD" RECORDS TO THEIR "PARENT" RECORD

NOTE: Child records MUST be directly beneath their Parent record.

A single Direct Campaign Expenditure could benefit more than one candidate or officeholder. In the example below, the filer paid AAA Billboards \$5,000 to for a billboard advertisement supporting two candidates. The payee name and amount are in the first, or "parent", record, along with name of the first candidate benefitted. The second, or "child", record, does not repeat the payee name or amount, but only contains information about the second candidate benefitted. The first record is the "parent", Field #3 (the Item_ID) has a value of 22. The second record is the "child", and has the value of the parent Item_ID in Field #32 (BakRef_ID). The Item_ID and BakRef_ID are not necessary when importing records because the Import utility automatically assigns them. For this reason, child record(s) MUST be directly beneath their parent record.

```
EXPN,F1,22,E,AAA Billboards,,,,,2001 Wagon Trail,,Austin,TX,78723,USA,20260401
,5000.00,Billboard ad for John Candidate and Jane Candidate without their
knowledge or consent for all of February 2026,,,Candidate,Jane,MS
,,OTHER,Mayor of Smallville,,,STATEREPR,151,,,,,,,,,,,,,ADVERTISE,
EXPN,F1,22-DCE1,,,,,,,,,,,,Candidate,John,MR,JR,STATEREPR
,,151,,GOVERNOR,,,,,22,,,,,,,,,,,,,
```

A single expenditure for Travel outside the State of Texas could pay for more than one individual's travel. In that case, the payee name and amount would be in the first, or "parent" record, along with the name of the first individual who is traveling. The name of the second individual who is traveling would be placed in a "child" record directly beneath the parent. The child record would not repeat the payee name or amount, but would only contain information about the second individual's travel. For example:

```
EXPN,F1,,E,Texas Airlines,,,,,123 Main St.,,Dallas,TX,75201,USA,20260501
,595.99,(See travel info),,,,,,,,,,,,,X,Jones,Jerry,,,COMMAIR
,, "Austin, TX",20260509,"Boston, MA",20260509,Boston Conference on
Redistricting,,,TRAVELOUT,
EXPN,F1,,,,,,,,,,,,,X,Smith,John,MR,,,COMMAIR
,,Dallas TX,20260509,"Boston, MA",20260509,attend Boston Conference on
Redistricting,,,,,
```

If field #4, Entity_Code, is blank, the import function assumes the record is a "child". If field #20, Cand_NamL is not blank, then it assumes the child record contains Direct Campaign Expenditure (DCE) information. If field #35 (Trvl_NamL) is not blank, then it assumes the child record contains Travel information. Because Field #3 (Item_ID) is automatically assigned by the Import utility, all child records MUST be placed directly beneath their parent record so that Field #32 (BakRef_ID) and Field #46 (Trvl_BakRef) will be assigned the correct values.

Examples of "child" records

1. EXPN "parent" records can have one or more "child" records which are used to identify Candidate/Officeholder beneficiaries of a Direct Campaign Expenditure. NOTE: a Direct Campaign Expenditure is an expenditure made to support a candidate, without that candidate's knowledge or consent. Please see the expenditure to Susan Candidate in the sample file for an example of how to report an expenditure to a candidate with her knowledge and consent.

EXPX records can also have one or more "child" records which are used to identify persons who traveled outside the State of Texas.

NOTE: an expenditure record should never contain BOTH Direct Campaign Expenditure info and Travel info. Use child records to report each kind of information.

2. RCPT and PLDG "parent" records can have one or more "child" records which are used to identify persons who traveled outside the State of Texas. There is currently no way to import child Travel records for contribution or pledges, so that info must be entered in the online filing system after importing.
